AB A sponge having excellent absorbing and desorbing properties and hydrating property is manufactured in a process comprising the steps of mixing polyvinyl alc. powder, water, starch, dextrin, and formalin; heating to melt the mixture to obtain a gel; mixing the obtained mixture with a blowing agent and an acid; heating to obtain a foam; dissolving the hydrolyzed starch and dextrin by contacting the foam with water; and mixing at least one of sodium alginate, CM-cellulose, or carboxymethyl starch in the first or second mixing step.
